

Industry Internships:

The Civil Engineering Department actively facilitates industrial internships for final-year students to bridge the gap between academic learning and real-world engineering practices. Renowned construction companies such as Sobha Developers, DMR Construction Company, and other reputed industry partners offer internship opportunities that provide hands-on experience in ongoing projects, site management, structural design, and quality control. These internships enhance students' practical knowledge, improve their employability skills, and expose them to industry standards and professional work environments.
